Unit 0: Module Overview

BSS 310 Engineering Management 2026

Lecturer: Prof. Michael Ayomoh

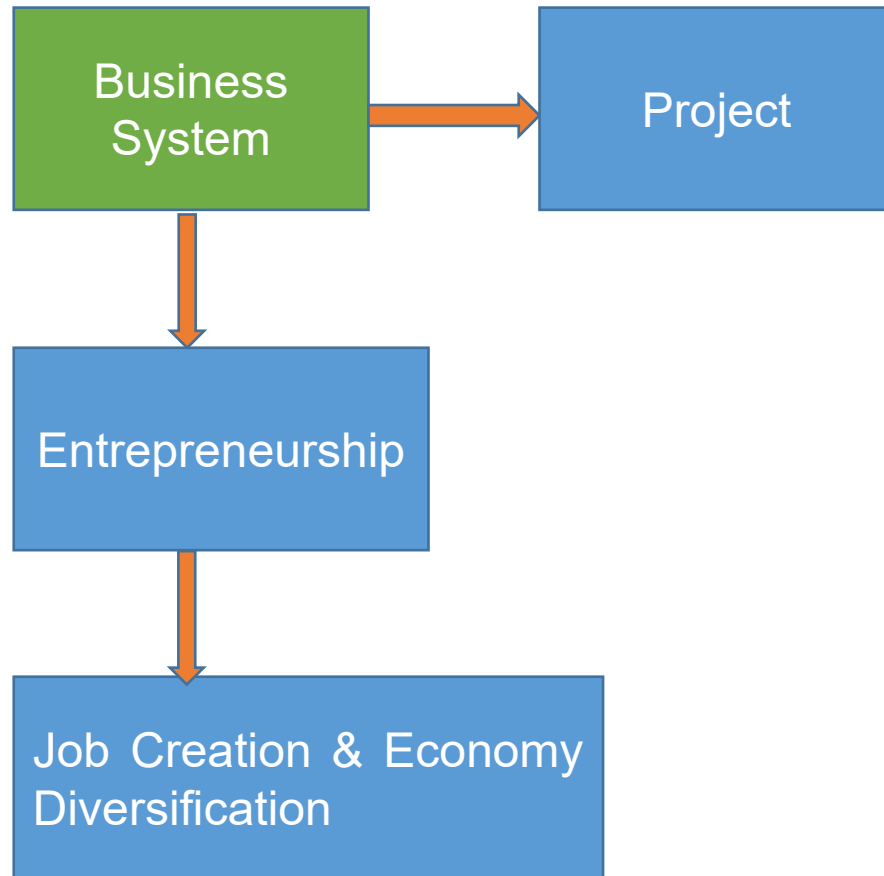

Overview revolving around the study guide (SG)

A BRIEF ON ENGINEERING MANAGEMENT [SG: Pg. 6; Section 1.1.1]

- What is Engineering Management? It is a multidisciplinary profession that integrates engineering and human-centric skills for management and sustainability of designed and developed systems.
- Why do you need to study Engineering Management? To add soft skills to your engineering skills. These skills span across people/human management, resource management, strategic planning, financial management, etc.
- Who needs Engineering Management? Individuals who want to rise into the managerial cadre such as becoming a CEO of an engineering-based firm in the future.

Goal and mission of the module: Entrepreneurship attainment through the integrated knowledge of **PM**, **EDM** & **BSDM**

- All businesses require strategic planning covering functional and physical capabilities identification [Business Systems Design & Management (**BSDM**)]
- All businesses require skills in [Project Management (**PM**)] to be developed
- All businesses require [Economic Decision Making (**EDM**)]

An overview of the module

The expected learning outcomes herein will include following overview:

- ECSA GA 11 [SG: Pg. 6; Section 1.1.2; Pg.9; Section 3; Pg. 15; Section 4.2.2; 4.2.3]
- Introduce lecturing team [SG: Pg.7; Section 2]

STRUCTURE OF THE MODULE

- Have you gone through the study guide? Any questions?
- The components of the module and outcomes (Outcomes 1, 2 & 3) & (knowledge areas BSDM, PM, EDM)
- Understanding the assessment opportunities, including the **(Competence vs Mark-Based Assessment)** approach
- Occasional in-class exercises (using point solution, not counting for assessment)

An overview of the module

- Formation of groups and expected group activities (random assignment after 1st of March)
[SG: Pgs.11-12; Sections 4.1.1.3 - 4.1.2.3]
- Discussions around the project rubrics (progressive discussion over the next set of lectures) **[SG:Pg.7;Sections 4.1.2.4]; [Rubrics are on a separate document]**
- 3rd of May submission due date; 6th of May peer review due date (due date adherence penalty applies 15% mark loss from the total project score each day submission is delayed) **[SG: Pg.12; Section 4.1.2.3]**
- One submission opportunity for the supplementary project (*Failure to attain competence in the supplementary opportunity would mean no exam entrance*).

An overview of the module

EXAM

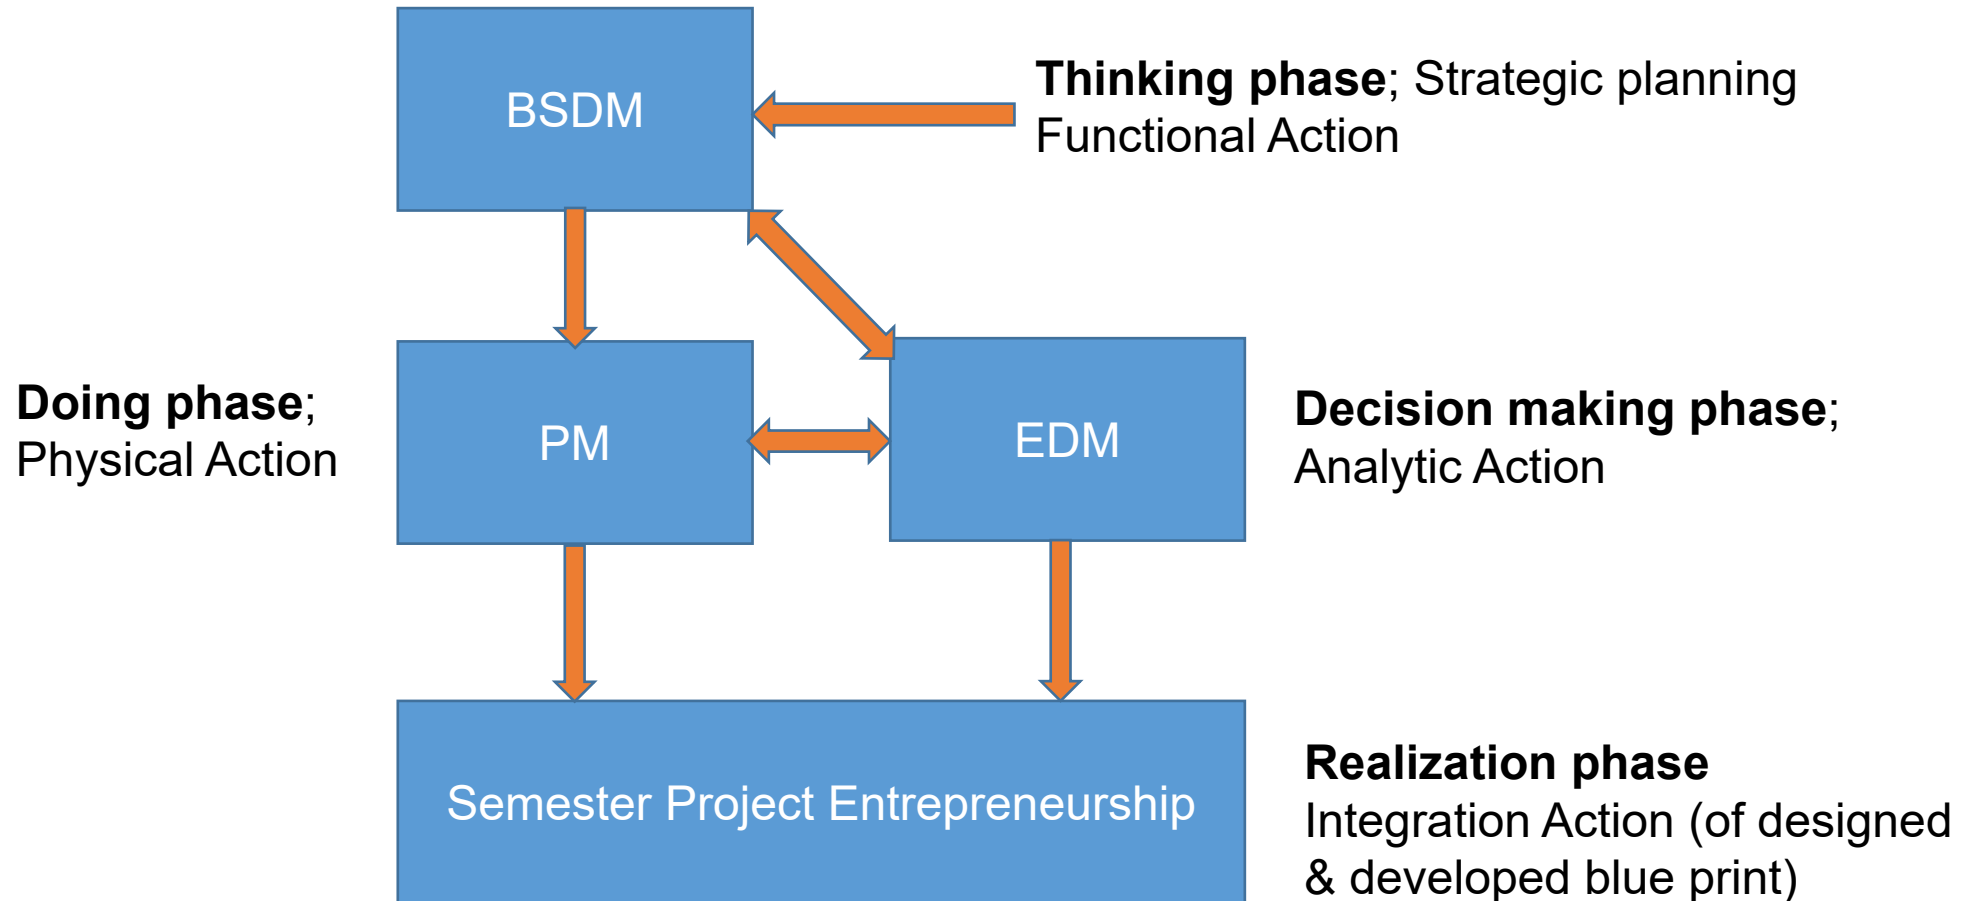

- Main exam entrance conditions *(Minimum 40% semester mark + competence in the semester project)*
- One opportunity for the supplementary exam during the normal supplementary exam opportunity *(Failure to attain competence in the supplementary opportunity would mean failure of the module).*
- Pass condition/s for the module

An overview of the module

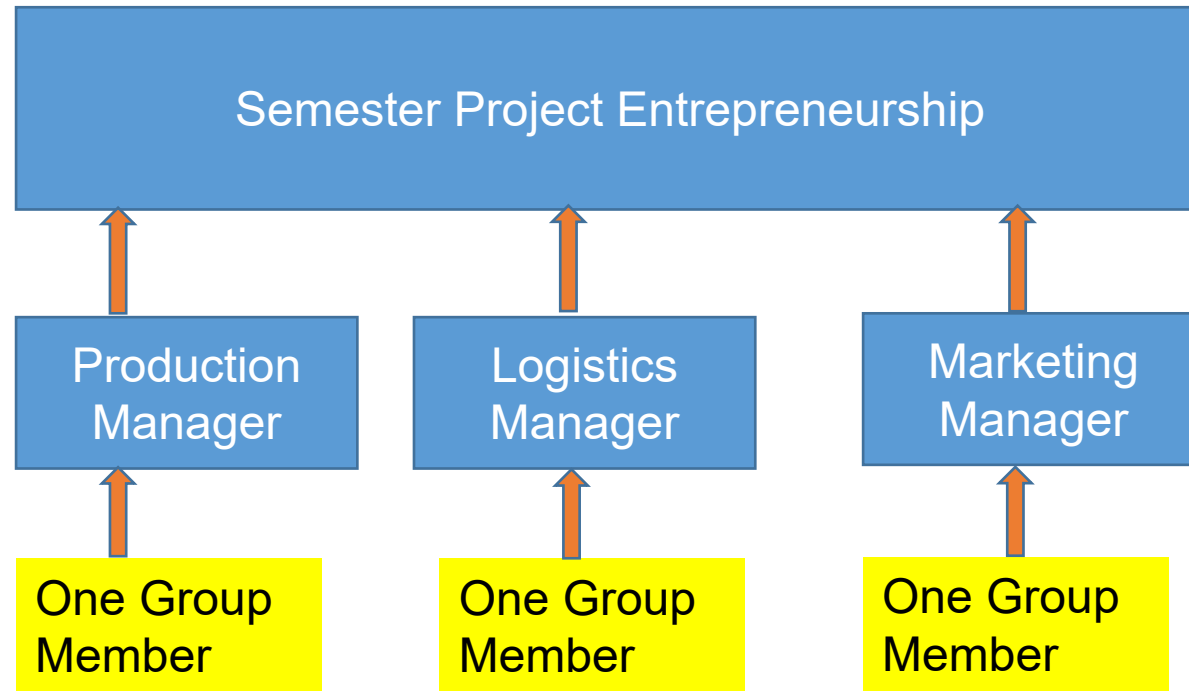

OTHER MATTERS

- Attend any lecture session if time-table conflicts
- Class reps familiarisation over time
- Lecture materials/books [**SG: Pgs. 8-9; Section 2.3**]
- Point solution for in-class quizzes (not for formal assessment)
- Ask colleagues for anything to add

Knowledge Areas, Architected

Semester Project Split Tasks

Final Remarks

Kindly refer to the study guide in an effort to consolidate the entire discussions

End
